Overview

Poland has just rolled out one of Europe's most ambitious energy storage programmes - a €980 million initiative that's set to transform the country's grid infrastructure. The Polish Ministry of Climate and Environment has finalised this landmark subsidy scheme, targeting over 5 GWh of new storage. In Poland, interest in energy storage investment has been evident for some time. Last year's main auction of the power market, with capacity delivery for 2029, further bumped up the capacity of storage projects. A capex support programme targeting electricity energy storage for grid support has. The exhibition showcased a range of innovations, from advanced photovoltaic systems to cutting-edge energy storage technologies, reflecting the dynamic growth of the renewable energy sector.
