

# Energy storage lithium battery production capacity city ranking

**PV / DG  
Application**

**APP Intelligent  
Control**

**Multi-Unit Parallel  
Expansion**

**98.8% Max.  
Efficiency**

## Overview

---

This graphic highlights the top 20 BESS markets by current and planned grid capacity in gigawatt hour (GWh), based on exclusive data from Rho Motion as of February 2025. As with the EV market, China currently dominates global BESS deployments, accounting for approximately two-thirds of installed. According to the Energy Institute, Canada and all unlisted countries combined produced 3,600 tons of Lithium in 2023, for 1. External sources place Canada's production at 3,400 tons, leaving the rest of the world's production at 200 tons for 2023. Totals for the United States. Nameplate lithium-ion cell capacity (EV and stationary). "Announced 2030" combines operational, committed, and announced projects from public trackers. Scale: 0-6,500 GWh (ticks every 1,000). Global lithium-ion cell nameplate capacity passed ~3 TWh. In 2024, the market grew 52% compared to 25% market growth for EV battery demand according to Rho Motion's EV and BESS databases. China leads global battery manufacturing with over 70% of the world's production capacity. China is the undisputed leader in battery production, manufacturing more than 70% of the world's lithium-ion batteries. The country's dominance comes from its robust supply chain, abundant raw materials, and.
