

# Energy storage system monitoring software

## Overview

---

To effectively monitor energy storage systems, various software solutions are employed. “We are very impressed with ETB's monitoring and tracking capabilities! We have active experience with around 10 different established monitoring platforms. Emerson's Ovation™ Green renewable solutions combine field-proven power plant controllers and SCADA software into an integrated energy management system that dynamically monitors. Smarter Power – delivers an integrated app and residential battery storage system for real-time tracking, multi-unit control, and optimization of energy usage plans. Each software serves unique functions tailored to specific needs within.
