

# Energy storage systems bulgaria

## Overview

---

Bulgaria's Ministry of Energy has approved €588 million in funding for 82 standalone battery energy storage projects, totaling nearly 9. The transaction marks one of the country's most advanced storage financing deals to date, supporting Bulgaria's transition toward a more flexible and. Bulgaria's Ministry of Energy has approved grant funding for 31 battery energy storage system (BESS) projects totaling more than 4 GWh, under the second round of the National Renewable Energy Storage Infrastructure (RESTORE 2) program, part of the country's National Recovery and Resilience Plan. The battery energy storage system is the first phase of a 315 MW/760 MWh system that is being developed alongside 238 MW of solar under Bulgaria's largest hybrid power project to date, due for completion next year. Vienna-based independent power producer Renalfa IPP has commissioned the first phase. Bulgaria became the EU's fastest-growing market for battery energy storage systems (BESS) in 2025, installing close to 2,500 MWh of new capacity, and is poised for a four- to fivefold expansion in 2026. The final decision, announced on Ap, concludes a competitive selection process that began with 151 proposals in August 2024. With nearly 10 GWh of standalone energy storage capacity awarded—more than triple the initial target—the country is making significant headway in reinforcing.
