

# Environmental sustainability sierra leone

## Overview

---

Sierra Leone ranks among the 15 worst climate-affected economies, with projected temperature increases and erratic rainfall patterns threatening agriculture and infrastructure, potentially causing GDP losses of 9-10% by 2050. As we release the Environment Protection Agency's (EPA) 2024 annual report, we take stock of the tremendous progress we've made this year and anticipate our goals for 2025. The successful execution of the EPA Transformation Strategy (EPATS) is highlighted in this report, demonstrating our steadfast.

WASHINGTON, Octo- The World Bank today approved an additional grant of \$18.34 million to support Sierra Leone in enhancing biodiversity protection, environmental sustainability, and climate change resilience. This funding, provided through the Least Developed Countries Fund (LDCF). The Society on Environmental Pollution (SEPSiL) is a social enterprise, voluntary, nonprofit and non-governmental organisation established in 2024 and legally registered to work with local communities, state and non-state actors, including local and international networks in combating all forms of.

The Forest Stewardship Council (FSC) has officially approved a new Interim Forest Stewardship Standard (IFSS) for Sierra Leone. Endorsed on Octo, the standard is set to take effect on Ma, providing a comprehensive framework for responsible forest management and sustainable. Environmental issues in Sierra Leone are partly related to local human activities, including deforestation, soil degradation, overfishing and water pollution. Deforestation is mainly caused by commercial timber, agricultural uses and fuel demand, which leads to soil erosion and loss of wildlife. As Sierra Leone charts a path toward sustainable development, the focus is turning to the country's vast potential in the green economy, particularly in renewable energy.
