

Factory solar power installation price

Overview

Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown to include cost models for solar-plus-storage systems. NLR's PV cost benchmarking work uses a bottom-up. Modern solar panel manufacturing facilities represent a critical investment in our sustainable future, with costs ranging from \$100 million for basic assembly plants to over \$1 billion for advanced facilities that produce everything from raw silicon to finished panels. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. This typically translates to about \$2.50 per watt of installed capacity (more on price per watt below).
