

Fast charging of folding containers for bridges

Overview

Until the electric power grid is able to support fast charging for EVs everywhere, there is likely to always be a market for something like Fellten's Charge Qube – a containerised system that stores energy in repurposed battery packs and can charge multiple vehicles simultaneously. Until the electric power grid is able to support fast charging for EVs everywhere, there is likely to always be a market for something like Fellten's Charge Qube – a containerised system that stores energy in repurposed battery packs and can charge multiple vehicles simultaneously. The Charge Qube is a revolutionary rapidly deployable Mobile Battery Energy Storage System and Mobile Electric Vehicle Supply Equipment (Type-2 or CCS) designed to meet the diverse and demanding needs of businesses, fleets, and infrastructure projects. Designed for speed and efficiency, the Charge. Shipping containers provide a cost-effective and durable option for bridges with prices significantly lower than traditional materials. Image for illustration purposes. As electric vehicles (EVs) become increasingly popular, the need for efficient charging infrastructure grows. The innovative Fellten Charge Qube is an all-in-one, energy storage and charging system housed in a 10-foot shipping container. Designed for versatility, sustainability, and rapid.

Fast charging of folding containers for bridges

Fellten Charge Qube

It can charge up to 12 vehicles at the same time at up to 7 kW per port. There is also an integral, 22 kW charger for rapid top-ups during the day. The smart charging software prioritises overnight charging ...
