

Flexible photovoltaic panel installation method diagram

 LFP 12V 100Ah

Overview

This video will show you in detail how to install flexible solar panels using the stick-on method. Select a suitable installation location with sufficient sunlight. Before installation, the thickness of the adhesive should not be less than 4 mm, and the width should not be less than 10 mm. And a width of not less than 10mm on the surface for various types of industrial and commercial roofs. The water channel is installed in the blank place of the roof as a maintenance channel and drainage, of not less than 10mm at the crest of not less than 10mm at the bonding place between tiles. While it seems simple to mount a flexible solar panel, common installations such as sealing around the edges of the solar panel and direct adhesion of the solar panel to a surface using Sikaflex and most other adhesives WILL damage the solar panel AND void your warranty, please continue reading the. Mounting flexible solar panels involves applying an adhesive to the back of the panel and pressing it onto the desired surface, usually a roof or deck of an RV, boat or van.
