

# French backup energy storage battery

## Overview

---

Harmony Energy's 100 MW / 200 MWh battery is operational, and large builds are underway at Cernay (TAG Energy, 240 MW / 480 MWh) and Saleux (Kallista Energy, 120 MW / 240 MWh). Distributed low-voltage batteries are spreading quickly. France's battery operational fleet is growing and starting to shift to longer durations France's battery fleet is continuing to scale and is on track to reach 1. Growth is slower than in solar-heavy Germany. But capacity is rising, driven by a dense layer of distributed batteries. As a global solar battery manufacturer with proven installations in over 138 countries, GSL ENERGY has become a trusted partner in providing advanced energy storage solutions for French businesses. Highlights of GSL ENERGY in France High-Performance LiFePO<sub>4</sub> Batteries with 6500+ cycle lifespan. Independent solar energy producer Amarenco has launched the repowering of a 105-MW/100-MWh battery energy storage system (BESS) in Saucats, France, which will be upgraded from one to two hours of storage. We develop and operate modular energy storage systems using long-life Lithium Iron Phosphate (LiFePO<sub>4</sub>) batteries, supported by a proprietary. R&D is recharging its batteries! As recently as fifteen years ago, energy players were happy to say that energy could not be stored in the form of electricity. This landmark project marks the start of an ambitious expansion plan for 2025, with accelerated solar and storage development activities.
