

Galvanized thickness of photovoltaic panel bracket

Overview

The thickness of the hot-dip galvanizing shall comply with EN ISO 14713 and ISO 1461, but it shall have a minimum value of 80 microns unless otherwise specified. All bolts (except stainless steel) shall be hot-dip galvanized. SteelPRO Group is a manufacturer of high-quality galvanized steel photovoltaic racking, providing reliable, durable and efficient photovoltaic support solutions tailored to your needs. Our products comply with international standards such as ISO 1461 and ASTM A123, ensuring excellent corrosion. Design according to current international and American Codes and Standards, there are:

- b. Electrical and other professional information provided
- c. Basic Design Parameters Basic Wind Speed 3-second (MRI=?

Years): Design Wind Speed 3-second (MRI=?

Years): 4. Although the technical indicators of solar brackets have been unified and regulated to a certain extent by national and industry norms, the substandard thickness of hot-dip galvanized solar brackets is still a relatively common technical problem of brackets.

Galvanized thickness of photovoltaic panel bracket

Solar mount system hot-dip galvanizing thickness

The thickness of the bracket is generally greater than 2mm (for some seaside, high-rise and other windy areas and areas, it is recommended that the thickness should not be less than ...
