

Great Gobi Desert Solar Power Generation

Overview

China Three Gorges Corporation (CTG) has launched the world's first dual-tower, single-generator solar thermal power plant in the Gobi Desert. This new plant is designed to be cheaper and more efficient than traditional solar thermal power stations, making it a major step forward for renewable. In a first, China has switched on a solar thermal power station in the Gobi Desert, a project described as a more cost-effective and efficient use of the technology, with the potential to be scaled up, South China Morning Post reported. By Captain Wang / Shutterstock. A 220-meter molten salt tower – surrounded by 14,500 sun-tracking mirrors – now generates clean energy while illuminating new possibilities for.

Great Gobi Desert Solar Power Generation

Dual-tower solar thermal plant begins operation in China's Gobi Desert

This new plant is designed to be cheaper and more efficient than traditional solar thermal power stations, making it a major step forward for renewable energy. The power station is located in ...
