

Great Wall Fengjun 5 generator light is always on

Overview

A solid yellow (amber) light on the side of the generator indicates a maintenance interval has been reached or that a non-critical alert warning (LOW BATTERY, BATTERY PROBLEM, CHARGER WARNING, CHARGER MISSING AC) is present. Check the control panel display. How to reset the maintenance light on a 2018 Fengjun 5 diesel model using a small wrench?

To reset the maintenance light on a diesel Wingle 5, follow these steps: 1. At this time, there is no need to start the engine. Simply turn the switch to the "NO" position. Assess Needs: Determine the power. In conclusion, several factors can cause your generator to run without supplying power to the outlets. These range from tripped circuit breakers and unresponsive GFCI outlets to damaged outlet receptacles, overloaded generator capacity, and improper engine tuning.
