

# Green electricity accra

## Overview

---

President John Dramani Mahama has announced a bold, long-term plan to develop a new Green Digital City intended to decongest Accra by relocating key government agencies and critical offices, as part of a broader vision to integrate energy innovation with industrial transformation. The Swiss renewable energy company NEK Umwelttechnik AG (NEK) has been developing in the past years six large-scale onshore wind farms in the Greater Accra Region of Ghana, which are ready for implementation. The total capacity to be installed is approximately 1,300 MW through the six projects. As a Ministry responsible for energy policy formulation. The company's focus on innovative solutions and strong logistical services positions it as a leader in the energy sector, with a promising outlook for a future centered on green energy. Under Project Zero, the business is transitioning high energy-consuming facilities to cleaner power sources while reducing operational. Solar and biogas technologies are fit for adoption in informal settlements but have limited adoption due to many barriers, including cost, knowledge, technical expertise, financial support, and others. In the Global South, most equipment for alternative energy sources is imported, which attracts.
