

# Grid-connected energy storage cabinet for drilling sites

## Overview

---

It is connected in series between the grid-connected inverter and the energy storage cabinet. The product has a series of protections, including energy meter, undervoltage tripping, low grid voltage, high grid voltage, input lightning protection, system overcurrent. Featuring lithium-ion batteries, integrated thermal management, and smart BMS technology, these cabinets are perfect for grid-tied, off-grid, and microgrid applications. Explore reliable, and IEC-compliant energy storage systems designed for renewable integration, peak shaving, and backup power. A battery energy storage solution offers new application flexibility and unlocks new business value across the energy value chain, from conventional power generation, transmission & distribution, and renewable power, to industrial and commercial sectors. The 4th-gen model offers customized overall energy solutions, supporting critical scenarios like peak shaving, virtual power plants. ars, the increasing scale and complexity of drilling operations have significantly raised power requirements. The product has a series of protections.
