

## Overview

---

The project, which became effective on Janu, will transform electricity delivery in Majuro, home to nearly half of the country's population, while supporting RMI's ambitious climate targets of reducing diesel consumption for power generation by 65% by 2025, with a long-term. The project, which became effective on Janu, will transform electricity delivery in Majuro, home to nearly half of the country's population, while supporting RMI's ambitious climate targets of reducing diesel consumption for power generation by 65% by 2025, with a long-term. Majuro, Marshall Islands – The Asian Development Bank (ADB) and the Republic of Marshall Islands (RMI) have officially launched a groundbreaking \$17 million energy transition project aimed at modernizing the country's power infrastructure and advancing its clean energy goals. The Energy Transition. Sinosoar, a major China-based engineering company, won the World Bank contract to build new generators and build a new power plant. Demolition and clearing of the first power plant which opened in 1982, is nearly completed with construction of the new facility expected to start later in May. Has the Development Objective been changed since Board Approval of the Project Objective?

2. The Marshall Islands Electricity Roadmap presents costed. The Marshall Islands is a small, remote country. It comprises 29 atolls and 5 islands with a total land area of 181 square kilometers in an exclusive economic zone of 2 million square kilometers in the north Pacific.
