

# H Steel Solar Support Node Style

*LiFePO<sub>4</sub> Battery, safety*

*Wide temperature: -20~55°C*

*Modular design, easy to expand*

*The heating function is optional*

*Intelligent BMS*

*Cycle Life: ≥ 6000*

*Warranty: 10 years*

## Overview

---

Our H beam steel for solar mounting systems is engineered to provide exceptional strength and dimensional stability under varying environmental conditions. Manufactured with high-tensile carbon steel or galvanized coatings, these beams ensure secure foundation and alignment for solar panels. Ideal stem /Solar panel support frame. The same applies of course to adjustable signs to an even greater. H Beams is a new type of economic construction. During rolling, each point on the cross-section extends more uniformly and the internal stress is small. What is a Steel H Post?

Steel H posts are structural beams characterized by a distinctive 'H' shape, formed by two vertical flanges and a horizontal web. Advantage of Steel H beam: The section modulus, moment of inertia and corresponding strength of H-beam are obviously better than ordinary single-strength. H beam Pile material is in accordance with ASTM A992 OR ASTM A572, the surface anti corrosion hot dip galvanizing process according to ASTM A123.
