

Home inverter system in China in Czech-Republic

Overview

Chinese inverters in small solar power plants represent a potential security threat to Czechia, the country's National Cyber and Information Security Agency (Nú kib) has said. Solarity specializes in photovoltaic (PV) systems, offering a wide range of products including inverters. With extensive experience and partnerships with leading manufacturers, the company effectively meets the needs of PV professionals. The market in the Czech Republic is growing due to increasing demand for energy-efficient solutions, particularly in solar. The inverter converts direct current into alternating current, thanks to which the energy from the photovoltaic system can only be used. These devices aren't your grandma's solar converters - they're more like bilingual energy diplomats negotiating between sunshine and grid power.
