

Home solar power grid connection process

Overview

That process is called solar interconnection, and it is what lets you power your home with cleaner energy and send any extra back to your utility. Here's a complete walkthrough of how it works, how long it takes, and what to expect along the way. Load-Side Connection Dominates Residential Installations: The 120% rule limits total. Installing solar panels is a big step toward energy freedom. But once the panels are up, there's one more step before your system can go live: connecting it to the grid. Solar panels are made up of multiple photovoltaic (PV) cells that capture the sunlight and convert it into electricity in Direct. Each solar panel contains multiple photovoltaic (PV) cells that capture sunlight and convert it into DC (direct current) electricity.
