

Homemade photovoltaic panel stretcher

Overview

Store-bought solar panel stands and mounts regularly cost five times as much. What's more, this homemade stand is adjustable, portable, and easy to build. Follow Step 2 and Step 3 to find. Cutting costs is a priority for many solar enthusiasts, and building a DIY solar panel mount is a savvy way to install your panels on a budget. By making your own mounting system, you can save on hardware that typically makes up around 10% of a solar project's cost. The design shown in the video was unchanged. Solar cells are available from a range of suppliers all over the world and can be easily assembled into your own custom built solar panel. The above unit is priced on the higher end for what you can find on Amazon – but it is a power monster! The solar generator I am going to show you how.
