

How big a solar cell should I use for a 5v 2A on-site energy source

Overview

We need to generate 32 kWh per day to cover energy usage during the day and to charge up the batteries for night time energy usage. 5 hours of sunlight daily, a system size of around 6 kW AC should do the trick (remember, AC power, not DC!). 5 hours a day is around 32. Solar Panels Efficiency during peak sun hours: 80%, this means that a 100 watt solar panel will produce 80 watts during peak sun hours. Here are the steps to sizing your system. Many battery manufacturers recommend a maximum charge.
