

How do photovoltaic panels clean themselves

Overview

To clean solar panels, start by turning off the system for safety. Then, remove any loose debris with a brush or leaf blower. Next, wash the panels with a soft cloth or sponge and a solution of water and mild soap or a specialized solar panel cleaner. In this guide, we'll cover how to clean solar panels safely and effectively, how often maintenance is needed, and how proper care helps you get the most value from your solar investment. When dust or other particles cover your panels, it means they won't be able to produce as much power—and that ultimately means you'll lose some of the financial benefits of. To keep your solar panels working effectively, it's a good idea to wash them once or twice a year or whenever they're particularly dirty. Proper maintenance reduces the risk of failures, short circuits, and overheating.
