

# How heavy is the photovoltaic panel of 625

## Overview

---

These panels cover an area of 17.62 square feet and weigh around 40 pounds, excluding the weight of frames and mounting equipment. On the other hand, commercial solar panels typically feature 72 cells, with dimensions of approximately 3. Shibana Energy's "Shibana PowerMax 625" sets a new standard in the realm of solar panel technology, offering an advanced solution for both residential and commercial solar power systems. This product epitomizes our dedication to providing sustainable energy solutions through innovative renewable. Model: 78HL4-BDV. All individual solar panels weigh less than 100 lbs. However, solar systems with 8kW rated capacity and above add more than 1,000 lbs to your roof. This weight makes them manageable, but still requires careful lifting during installation.
