

# How many hydrogen energy stations are there in Armenia

## Overview

---

According to Armenian energy's sector long-term strategy, approved by Government of Armenia, by 2040 is planned to have 500 MT battery stations in energy sphere. Taking into account this opportunity on Augthe Renewable Energy and Energy Saving of Armenia Foundation and the French Solges. Renewable energy resources, including hydro, represented 7.1% of Armenia's energy mix in 2020. Forming the foundation of Armenia's renewable energy system as of 6 January 2022 were 189 small, private. Armenia, a landlocked country in the South Caucasus, spans around 29,740 km<sup>2</sup> and has a population of roughly 2. Its economy is modestly diversified, with energy and mining supplemented by growing industries. Most designated, under-construction or operational small HPPs are der vational stations on natural water der 30 MW), mostly constructed since 2007. Based on its strong solar potential - and assuming preferential interest rates are secured - Armenia could produce green hydrogen at an internationally competitive price of ~3. A map of Armenia's National Electricity Transmission Grid can be found at the website of the Global Energy Network Institute [here](#).

## How many hydrogen energy stations are there in Armenia

### Armenia Hydrogen Fueling Station Market (2025-2031) , Outlook, Size

Historical Data and Forecast of Armenia Hydrogen Fueling Station Market Revenues & Volume By Modular Stations for the Period 2021 - 2029 Historical Data and Forecast of Armenia Hydrogen ...
