

How many watts is the solar voltage in Vatican City

Overview

One of the most notable solar projects in Vatican City is the solar roof of the Paul VI Audience Hall. The photovoltaic panels installed here generate approximately 300,000 kilowatt-hours of energy annually. Credit: Petr Polak

Most people would not expect the world's smallest country, with fewer than 1,000 residents, to lead the global energy conversation. Often referred to as the "Green Pope," Pope Benedict XVI was a vocal advocate. Agrivoltaics involves the dual use of land for solar energy production and agriculture. They are built with a series of solar panels that coexist with crops, livestock or both. In an apostolic letter, the pontiff said the project will be constructed on Vatican-owned property outside of. The Vatican City has achieved complete energy independence through renewable sources, making it one of only eight countries running on renewable energy worldwide.
