

How many watts of solar lights are bright enough in the yard

Overview

A wattage of one to ten watts should be enough for most outdoor areas. As a result, it is wise to choose a wattage that will still provide sufficient brightness when. How many lumens do you really need for your solar lighting project?

It depends on the application. A decorative solar garden light that adds a gentle glow doesn't need to be bright—5 to 50 lumens is common. Efficient placement can maximize benefits. For areas like patios or decks, lights ranging from 100 to 250. For many years, people judged the brightness of a bulb almost entirely by its wattage. But as mentioned above, there are a number of variables that will determine the optimal wattage.
