

# How many watts should I choose for solar panels in the garden

## Overview

---

About 97% of solar panels quoted on the EnergySage Marketplace in 2025 are 400 to 460 watts—expect to see panel outputs in this range in your quotes. Your panels' actual output will depend on your roof's shading, orientation, and hours of sun exposure. How many watts should I choose for solar panels in my garden?

1. The amount of energy required by the household and garden systems is paramount, 2. But what does wattage really mean?

It's the measure of electrical power the panel generates under perfect conditions. The higher the wattage, the more power per panel, which can directly affect how. This solar panel wattage calculator allows you to calculate the recommended solar panel wattage according to the energy consumption of your household appliances.
