

How many years can a solar inverter be guaranteed

Overview

Standard warranties range from 5 to 25 years, with most string inverter warranties covering 5 to 12 years, while microinverter warranties often last 20 to 25 years. However, some companies might charge a transfer fee by asking for all the relevant documentation and warrant the transfer process. That's not a flaw – it's just how electronics age, especially. While solar panels are exceptionally durable and built to last 25 years or more, the inverter is a complex piece of power electronics that handles immense electrical stress and heat. This makes the inverter the most likely component in the entire solar array to require replacement during the.

How many years can a solar inverter be guaranteed

How Long Do Solar Panels, Inverters, and Batteries Last? A

Inverters have shorter lifespans than solar panels, generally lasting 10 to 15 years. This is because they're electronic devices that endure continuous operation, converting direct current (DC) from the ...
