

# How much does Ukrainian energy storage battery cost

## Overview

---

Summary: This article explores the dynamics of energy storage battery prices in Ukraine, focusing on market trends, key applications, and factors influencing costs. Discover how lithium-ion and alternative technologies are shaping the renewable energy landscape, supported by data and real-world. This trend is supported by import data, showing a 105% increase in battery imports in 2024 to \$950 million. 4 The first industrial-scale BESS was installed in Ukraine in 2021 by DTEK, the largest private energy company in Ukraine., lithium iron phosphate (LiFePO<sub>4</sub>) or lithium ternary (NCM), etc. This translates to around \$150 - \$420 per kWh, though in some markets, prices have dropped as low as \$120 - \$140 per kWh.
