

How much is the current energy storage price per kWh

Overview

The cost of battery storage per kWh ranges from \$700 to \$1,300 installed for residential systems and \$125 to \$334 for utility-scale projects as of late 2025. Battery pack prices alone have dropped to a record low of \$70-\$108/kWh, representing a 93% decline over the past. This report is available at no cost from NREL at www.nrel.gov. Cole, Wesley, Vignesh Ramasamy, and Merve Turan. In 2025, they are about \$200-\$400 per kWh. This is because of new lithium battery chemistries. For Texas homeowners. Buyers typically pay a broad range for utility-scale battery storage, driven by system size, chemistry, and project complexity.
