

# How to assemble a solar generator set

## Overview

---

It's a five-step process that combines simple components into a DIY solar generator. Here's how, clear and beginner-friendly. You'll need: a solar panel (50-100W), a battery (12V, 20-50Ah), an inverter (100-300W), a charge controller (10-20A), cables, and a box or frame. Building your own solar generator is an empowering and eco-friendly way to harness solar energy for personal use. It uses sunlight to charge batteries and provide power. Then all the relevant input and output sockets are wired and mounted on the outside of the case where they are easily accessible.
