

# How to use the photovoltaic panels you buy yourself

## Overview

---

This guide will walk you through every step, from determining how much energy you need to assessing your home's energy generation potential. It also covers the necessary basic installation steps, from installing the mounting systems and panels to connecting them to your household. Installing solar panels yourself can save you thousands of dollars while giving you more control over your renewable energy system. You can easily set up a DIY solar system if you're comfortable with basic construction, running power tools, and electrical wiring. Integrating solar power into your home can be as simple as installing a single panel and battery system.

## How to use the photovoltaic panels you buy yourself

-  100KW/174KWh
-  Parallel up-to 3sets
