

# Huijue Energy Storage Frequency Regulation Project

## Overview

---

Huijue Group's 4MWh European energy storage project has outperformed expectations, generating €3,000–€5,000 daily with a two-year payback period. The project participates in aFRR/mFRR frequency regulation and day-ahead/intraday market arbitrage, capturing €50–100/MWh. Recently, Huijue Group, a global leader in energy storage integration, has delivered impressive operational data for its 4MWh European energy storage project. Leveraging robust hardware resilience and precise insights into Europe's complex electricity markets, the project actively participates in. The European Network of Transmission System Operators recently reported 42% more frequency deviations in 2023 Q2 compared to pre-energy transition levels. Frequency fluctuations essentially represent real-time energy imbalances. 5Hz deviation costs German industrial users approximately €1.

## Huijue Energy Storage Frequency Regulation Project

---

### Lithium battery parameters

Product capacity: 100Ah

Product size: 135\*197\*35mm

Product weight: 1.82kg

Product voltage: 3.2V

internal resistance: within 0.5

### Huijue Group's European 4MWh Energy Storage Project Exceeds ...

Huijue Group's 4MWh European energy storage project delivers EUR3,000-EUR5,000 in daily revenue by combining robust containerized hardware and intelligent EMS control for aFRR/mFRR ...
