Plug-in electric vehicles in Iceland

OverviewHistoryGovernment policyInfrastructurePublic transportation

In 1979, a university engineering professor from the University of Iceland, Gísli Jónsson obtained funding from the university to purchase a Jet Industries Electra Van 500 from the United States. The 4 passenger van had a 50-80 km range and used 16 6-volt batteries. He was an advocate for electric vehicle adoption and the purpose of the van was to test the vehicle in Icelandic conditions and demonstrate the use of electric vehicles in Iceland. It was eventually sold

in 1983 and used as a service vehicle for an a...
