

Indonesian energy storage project subsidies

Overview

This initiative seeks to accelerate the development of BESS projects as well as open commercial and public financing for the long-term development of these energy storage systems. The government of Indonesia has launched a programme that aims to build 100GW of solar PV and 320GWh of BESS in the coming years, mostly distributed across smaller projects in rural areas. As the country has committed to reaching net-zero emissions by 2060, this inventory report of energy support measures in Indonesia explores.

- Market Growth: Quantitative analysis indicates Indonesian BESS market expansion from USD 3.8 billion (2021), representing compound annual growth rate of 21. Overview of the Renewable Energy Sector 2.
