

# Installation of photovoltaic panels on prefabricated panels

## Overview

---

The short answer is NO, but it can be done with extra effort and creative thinking. Here are a few key reasons why prefabricated homes aren't typically ready for solar panel installation. Taking control of your energy production with a prefab solar kit is an empowering move toward sustainability and independence. These kits bundle the primary components, making the process more accessible. ✓ Prefab homes aren't structurally designed to accommodate solar panels compared to traditional or site-built. Installing photovoltaic (PV) systems is a key stride toward embracing renewable energy, which is crucial for reducing carbon footprints and fostering sustainable energy use. This comprehensive guide walks you through every step of your solar project, from initial assessment to system. Prefabricated or modular racking and mounting structures offer several advantages over traditional installation methods, making them an increasingly popular choice for solar energy projects.
