

Is it illegal to use solar power for personal use

Overview

It is generally legal across the US to install your own solar energy equipment, though state and local regulations can impose strict limits on how and where you do so. Most places in the country require your DIY solar setup to be permitted and inspected before you can legally operate. Paradoxically, the states most likely to do this are some that would greatly benefit from solar power, like Oklahoma, Kansas, and Nebraska. This legal article explains why. We bet most people would agree that these three statements are true: 1) You put solar panels on your roof to make your own electricity. While federal guidelines provide a baseline, local jurisdictions often implement additional requirements affecting everything from permit costs to HOA. Installing your own solar panels is legal in the US, but many places have regulations you must comply with. Homeowners associations have been a historic friction point. Luckily, many states have passed.
