8,000+ Cycles Lifetime

IP54 Protection Degree

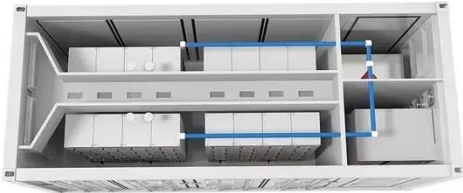

Overview

Let's clear the air — the overwhelming consensus among scientists and engineers is that solar panels are generally safe. While myths around solar panel radiation risk circulate online, there is no evidence proving that rooftop solar systems cause harm to people living underneath. Little do people know that solar energy systems can be dangerous to their health, due to the EMF's emitted. Just one of scores of health impacts can be increased cancer risk. EMF stands for manmade “electromagnetic field (s)”, such as produce unnatural electric, magnetic, or rf (microwave). Myth or Fact #1: Are Solar Panels Dangerous to Install?

Solar energy is among the safest forms of renewable energy. If installed well, it will back you up and stop that cash drain on your energy bills.

Is it safe under solar panels

Solar panel safety: Are solar panels safe?

Learn about some of the common solar panel safety concerns and what mechanisms are in place to prevent dangerous solar panel scenarios.
