

Is solar panel power generation worth it

Overview

The pros of using solar panels include a lower carbon footprint, lower electric bills, potentially higher home value and tax credits. The cons include high initial costs, specific roof requirements, possible higher property. With current tax credits and incentives, the average payback period for solar panels is between six and 10 years. However, solar. Solar panels are worth it for most homeowners, as long-term savings and increases in property value make up for the high initial installation costs. But with federal incentives ending soon for homeowner-owned systems, the financial benefits now depend more heavily on your energy use, local rates, and available.
