

# It s free to install photovoltaic panels in rural areas

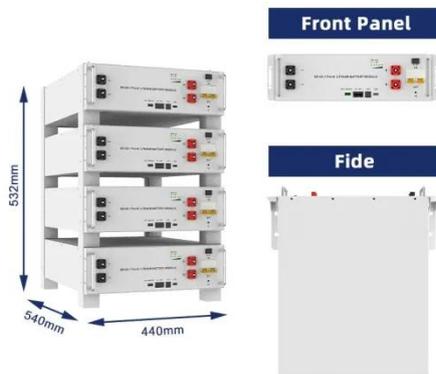

## Overview

---

The USDA's REAP offers grants and loans to rural homeowners and businesses to support renewable energy installations, including solar panels. It has been disheartening to see our beautiful farmland displaced by solar projects, especially in rural areas that have strong agricultural heritage. You can use the energy produced by your solar system in the place of electricity from the grid, and any surplus energy can be sold through solar energy programs. Agrivoltaics is defined as agriculture, such as crop production, livestock grazing, and pollinator habitat, located underneath. In 2025, the USDA's REAP grant can help dramatically reduce the upfront cost of going solar.
