Overview

EPRA proposed the introduction of Battery Energy Storage Systems (BESS) in Kenya as part of measures to reduce the impact of power blackouts and strengthen grid stability. This announcement followed the release of its 2024/2025 performance review on electricity reliability. key driver for economic growth. The National Energy Policy 2025–2034 is therefore a tool in spearheading our country's vision of equitable energy transition, focusing on innovation, resilience, and sustainability driving green industrialization. With over 25% of the population still lacking. NAIROBI, Kenya, Feb 3 – Kenya has renewed its call for faster deployment of solar energy and battery storage as Intersolar Africa 2026 officially opened at the Sarit Expo Centre in Nairobi, bringing together policymakers, investors and clean energy players from across Africa and beyond.

Kenya s new energy storage requirements

How Kenya is scaling solar energy system

Kenya is accelerating solar energy deployment and energy storage integration as Intersolar Africa 2026 officially opened in Nairobi, bringing together policymakers, investors, developers, ...
