## Overview

---

This paper examines the potential impact of plug-in electric vehicles (PEVs) on Kuwait's grid compared to hybrid cars, utilizing empirical parameters to assess their energy consumption, charging behavior, and implications for grid stability. The report provides a strategic analysis of the plug-in hybrid electric. Kuwait is one of the richest countries in the world with a high GDP per capita (\$38,000 in 2023) and remains a significant importer of new automobiles (as of December 2022, 2.6 million traditional vehicles were registered). But this number is set to rise sharply, thanks to a combination of policy push, private-sector investment, and changing consumer behavior.
