

# Large-scale and small-scale solar energy storage

## Overview

---

The difference between small energy storage and large energy storage is as follows: 1. Capacity size addresses the volume of. The AES Lawai Solar Project in Kauai, Hawaii has a 100 megawatt-hour battery energy storage system paired with a solar photovoltaic system. Sometimes two is better than one. However, for widespread deployment of grid energy storage to occur, the research community must continue to.

## Understanding Solar Storage

Millions of solar projects have been installed in the US; and while most solar installations do not include any form of energy storage, pairing solar with battery storage has become increasingly common.
