

# Latest prices for containerized energy storage in Nepal

## Overview

---

As of most recent estimates, the cost of a BESS by MW is between \$200,000 and \$450,000, varying by location, system size, and market conditions. This translates to around \$200 - \$450 per kWh, though in some markets, prices have dropped as low as \$150 per kWh. Key Factors. Energy resources of Nepal is classified as LCOE/kWh from about \$0. WECS cites a wind power potential of 3 GW; another report on 100% renewable energy cites 250 MW. Even pondage of several hours can provide a crucial function in peak hours. These numbers are affected by: Regional labor and material costs Local grid policies or incentives Project scale and technical. Residential, Commercial, Industrial etc. Kathmandu, nestled in the Himalayas, faces unique energy challenges.
