

Latest prices of solar panels in the Philippines

Overview

In 2025, a 300-watt peak (Wp) panel starts at about ₱7,068. Panels with higher capacity, around 400 to 500 Wp, range from ₱21,206 to ₱28,274 each. In the Philippines, exported power is credited at ₱5-6/kWh vs ₱10-12/kWh for consumption. Best strategy: Use more solar during the day. After payback, you get essentially free electricity plus increased property value. Typical grid-tied systems cost ₱160,000-₱180,000. The cost of individual panels depends. The tables below show solar panel prices in the Philippines for basic setups, including the cost per panel, the number of panels required, and the estimated total cost. Higher-wattage solar panels usually cost less per watt but are heavier because they are larger.
