

# Leading stocks in solar cell power generation

## Overview

---

In this article, we cover nine of the best solar stocks to buy in 2025, all listed on major U.S. exchanges. We aim to give you a clear, beginner-friendly view of each company, why it qualifies, and what the risks are. Currently, less than 4% of all U.S. power generation comes from solar, so there's plenty of room for growth in the years ahead. If you're a believer in the future of solar power and can look past the recent volatility from the solar energy industry builds and installs devices to capture energy from the sun and convert it into electric power. Companies in the industry are working to transition the global economy from fossil fuels such as oil and natural gas to renewable energy sources. The solar industry faced a 24% year-over-year decline in second-quarter 2025 installations, with all segments except commercial solar shrinking due to unfavorable federal policies and trade challenges.
