

# Long-term financing for outdoor telecom enclosures used in fire stations

## Overview

---

Whether your project involves community broadband, wireless densification, or utility network expansion, an outdoor telecom cabinet is a strategic investment that pays off in long-term performance and reduced total cost of ownership. Westell is excited to announce our new interactive portal to showcase our brand new fiber FDH Enclosures as well as our longstanding robust Outside Plant Enclosures and Integration Capabilities. Click below to see what is new in the Fiber world for Westell and explore our expanded Outside Plant. This article explores the many advantages of telecom cabinets designed for outdoor deployment and how choosing the right solutions, like Raycap's Fixed Telecom Cabinets, can make a significant difference in performance, durability, and long-term costs. A good telecom enclosure keeps your equipment working well for a long time. It also protects delicate parts from weather and damage. KDM's outdoor telecom enclosures are weatherproof, rainproof, waterproof, sun-proof, and dustproof cabinets with IP ratings of IP55 up to IP67 ratings and NEMA standards of 3R up to 6. They have adjustable rack sizes and spacing, a 3 and 4-point locking system, and solar caps to manage heat loads. Shelter Works engineered-to-order telecom shelters are the perfect solution for protecting critical field equipment. Our shelters, manufactured with our exclusive FiberBeam™ Technology, are lightweight, insulated, weather-tight, durable, and secure.
