

Macedonia s new energy storage

Overview

Motor Oil is developing a 20 MW / 80 MWh standalone energy storage unit in North Macedonia, as part of the country's updated green technology plan. Announced by Skopje in late January, the government's €5.7 billion initiative includes renewable energy and storage projects. The deadlines are to be ascertained at a later. A significant segment of the Plan covers electricity storage systems, which are crucial for the stability and flexibility of the power system. In total, the Plan covers 96. Battery licensing begins as 60 MW milestone nears, and 4 GW of storage proposals await review. Designed for tech-savvy policymakers and.
