Overview

Malé, Maldives — The State Electric Company (STELCO) is set to roll out a network of electric vehicle (EV) charging stations and EV motorcycle charging systems across the Maldives. In December 2020, the Government of Maldives updated its nationally determined contributions under the Paris Agreement and committed to reduce 26% of emissions by 2030 and further strive to achieve net-zero emissions with support and assistance from the international community. As per UNSD Energy. This article explores the current state of EV adoption in the Maldives, the government's initiatives to promote green mobility, and the benefits and challenges associated with this transition. According to STELCO, the station will be located on Dhonandharaadha Hingun, near the.
