

# Malta station-type solar energy storage cabinet system

## Overview

---

Malta's new energy storage solution has the potential to revolutionize the future of grid-scale energy storage. The system can draw electricity from the grid in times of plenty and store it for hours or days, waiting until a time of high demand before releasing. Malta's utility-scale, long-duration energy storage system uses steam-based heat pump technology to deliver dispatchable, cost-effective energy. The announcement late last year of a \$26 million, Series A funding round for new start-up Malta Inc. Today's \$33 billion global energy storage industry generates nearly 100 gigawatt-hours annually [1], but lithium-ion batteries can't. "Utility-scale battery storage is a game changer for the electric grid. This article explores the technology's applications, local case studies, and how solutions like those.

## Malta station-type solar energy storage cabinet system
