

Manila solar container battery Production

Overview

The project, which is strategically located on the Philippines' main island of Luzon, about 100km from Manila, will combine 3.5GWp of solar PV capacity with 4.5GWh of battery energy storage system (BESS). These containers pack a punch: they store much-needed electricity for contingency – or “dispatchable reserves”, thus avoiding the need to build “peaker” plants powered by fossil fuel. 5. With strategic sea routes connecting to Asian markets and a skilled workforce trained in advanced manufacturing, facilities here achieve 18% faster production cycles compared to regional competitors.
